

MOTIONPASS

GEM SYSTEM ANNOUNCES LONG-TERM PARTNERSHIP WITH COMPANY MOTIONPASS

Our IT solutions will delight you!

MotionPass is a supplier of advanced automotive solutions in a number of areas. These include solutions for paying tolls and parking fees from the vehicle or faster charging and refuelling. The mutual cooperation is primarily based on the delivery of expert and consulting services. The projects and solution transformations delivered represent the most advanced know-how on the global market.

The MotionPass platform connects smart car drivers with businesses and services in their vicinity, allowing them to easily discover and pay for road tolls, parking, or refuelling.

MotionPass can be integrated with municipal paid parking zone systems, allowing drivers to pay according to each municipality's pricing policy. In addition to the payment process itself, the MotionPass platform provides operators with advanced usage statistics, making capacity planning easier.

MotionPass informs drivers about toll motorways, tunnels or bridges and allows for quick and safe toll purchase. The main objective is to make these services easy to access and use. At the same time, to make toll collection easier and the solution as a whole useful for drivers and operators.

MotionPass is a modern global automotive company based in Germany with Czech roots. The company targets markets within the EU and is active in almost all EU countries.
